

## CONSULATES ARE ATTACKED BY MOBS

**Peruvian Flag Burned by  
Chileans and Consul  
Resigns.**

**FEELING IS WARLIKE**

**Report That a Crowd in  
Callao Assaulted  
Chile's Consul.**

LIQUIQUE, May 29.—Following the tense feeling between Chile and Peru, which has prevailed in both countries for months, a mob gathered in this city yesterday, and marching on the fine building of the Peruvian Club, tore down the Peruvian flag and burned it.

The greatest excitement continues in this city, and the police are now guarding the clubhouse, although the mob has dispersed. But the streets are filled with excited groups.

**Report of Attack.**  
The feeling is intensified by reports that the Chilean consulate in Callao has been attacked by a Peruvian mob and indignities offered to the representative of this country.

The Peruvian consul here has resigned, and the American consul, Hon. Rea Hanna of California, has taken charge of affairs for Peru.

**Ringleaders at Liberty.**  
A report of the affair has been made to President Pedro Montt, at Santiago, but no word has been received yet as to what action shall be taken in regard to dealing with the ringleaders, who have not been arrested.

It is asserted here that if it is true that the Chilean consul at Callao has been assaulted, only the most careful diplomacy will avert the war which the people are clamoring for at this time.

## FIVE PERSONS DEAD IN AUTO ACCIDENT

**STRUCK BY AN ELECTRIC CAR  
WHILE CROSSING TRACK—  
OTHER FATALITIES.**

LOS ANGELES, May 29.—For the third time in two years five persons were killed at once by an electric car here yesterday, when Mr. and Mrs. Jerry Kaufmann and their son, Harry, and Mr. and Mrs. H. S. Hollingsworth tried to cross the track in front of one of the beach fairs.

The party was in an automobile and failed to estimate the speed at which the electric train was approaching. Miss Hazel Kaufmann escaped death in the collision, but is reported to be dying.

The accident before this happened on Thanksgiving Day, 1909, when a party of six, all of one family, was struck by a flyer and five were killed. A short time before that five in another family were struck and killed while trying to cross in front of a Whittier flyer.

## REPUBLICANS WIN IN THE PORTUGUESE GENERAL ELECTION

LISBON, May 29.—The elections held throughout Portugal yesterday were in the main orderly. Little trouble cropping up in any of the fifty-one assembly constituencies. All is quiet at an early hour this morning.

Returns from thirty of the fifty-one constituencies indicate that the majority of those elected to the chamber of deputies are Republicans. It is asserted that the monarchists refrained from voting.

An American chamber of commerce for the Turkish Empire has been established at Constantinople by Consul-General Rayndal.

## WELCOMES WILL BE GIVEN THEM

**Distinguished Visitors Com-  
ing This Year—Dr. Jordan  
Writes to Wood.**

Quite a number of distinguished people are expected to visit Honolulu this year. Prince Higashi Fushimi and Admiral Togo of Japan may stop over on their way home from the coronation, and a number of British colonial governors have expressed the hope that they can pay a visit here on the way back to their ports.

Now comes word that Dr. David Starr Jordan, president of the Leland Stanford Junior University, proposes to visit the Islands on his way to Japan next month. In a letter to Secretary Wood of the promotion committee last week Dr. Jordan says:

"I am expecting to go to Japan on the Siberia, which will reach Honolulu about June 24, and shall hope to meet again some of my old friends in that city."

Dr. Jordan will be given a hearty welcome when he arrives, for there are many here who know him well and many more who desire to know him better, while there are more than a few who have attended the University and would be delighted to renew their acquaintance with their former chief.

Then there is former Governor Fort of New Jersey, who may pay this city a long visit. Consul McNally, stationed at Tsingtau, has been paying a visit home and now writes as follows: "My wife and myself, who consider Hawaii but the immediate outskirts of heaven, have, we think, persuaded former Governor Fort of New Jersey and family to spend at least two or three weeks in the Islands when they arrive on their trip around the world."

And there are many others, not counting the congressional delegation which Delegate Kuhlke will try to have come here.

## SEE HONOLULU NOW AND FIRST OF ALL

**SANITARY COMMISSION MAY IN-  
VITE TOWN TO TOUR  
WITH IT.**

If the sanitary commission which has been holding the center of the municipal stage during the week and which will probably continue to do so this week, completes its tour within the next few days, it is probable that Honolulu will be treated to an auto procession shortly, when the business men of the city will be invited to go over some of the same ground as the commission has done.

No day has yet been set and the commission has not formerly met on the matter, but is considering it. It is its desire to have the cooperation of the influential citizens in its work in so far as to realize the importance of it and to appreciate what the real conditions of the "back-log" portion of the city is.

Chairman Carter believes that interest has been widely aroused in the matter and that those people who would be the most benefited by municipal cleanliness are waking up to the necessity of becoming personally interested in it.

It is for this purpose, that of giving all those who so desire an opportunity to post themselves and be able to discuss the matter intelligently, that the commission is thinking of acting as guide to as many parties as wish on a set day, and from other quarters will probably come the request that as many auto parties be made up among the business men as can be got together for the purpose. But four or five places will be visited, each one typical of some sanitary disorder in the city.

## WOULD DIVORCE MARINE OFFICER

RENO, May 18.—Corn Isabel Westcott has filed a suit for divorce from Capt. C. T. Westcott of the United States Marine Corps, stationed at Baltimore. Incompatibility of temperament is charged in the complaint.

Mrs. Westcott was a society belle in the eastern city. Her maiden name was Abrams. She has been one of the most popular members of the Reno colony.

Although divorce papers have been ordered left unserved by the judges of the district court, County Clerk Fogg refuses to allow the public to see any papers on file in his office.

Captain and Mrs. Westcott were married only a few years ago and have no children.

## FINDS IT EXPENSIVE TO KEEP WITNESSES

**UNCLE SAM HAS TO PAY FOUR  
HUNDRED DOLLARS A MONTH  
FOR EIGHT.**

It is costing the United States nearly \$400 a month to keep the witnesses here who will give evidence in the cases against Louis Coadon, Harrison Henry and Emil Scott, who pleaded not guilty in the federal court Friday to charges of assault on the high seas. Owing to the crowded state of the calendar the cases were continued for trial until called up. As the court will shortly be obliged to move from the Judiciary building to the Model block on Fort street it is not believed that the cases will be reached for some time.

Meanwhile eight witnesses, members of the crew of the bark R. C. Slade, on which craft the alleged assaults took place, are detained in jail here. They are being paid one dollar a day each and the government also has to pay fifty cents per diem for the keep. This works out at twelve dollars a day.

**Condemnation Suit.**  
The condemnation suit of the United States versus Coit Hobron et al., for land at Waikiki, came up in the federal court before Judge Clemens Saturday. A motion to amend the answer filed by Holmes & Stanley on behalf of certain clients was continued for another week.

Judge Clemens presided over a naturalization court Saturday morning and the men mentioned in The Advertiser received their final papers.

Lee Yuen Kwai, recently sentenced for selling unstamped opium, appeared in court once more to answer to two further indictments. The matter went over for further disposition.

Circuit Judge Robinson on Saturday put over until today argument on a motion by Lorrin Andrews on behalf of Mrs. Charlotte McQuaid to strike out certain passages in McQuaid's divorce complaint, in which he made charges of misconduct against his wife.

## An Alimony Question.

Circuit Judge Robinson was on Saturday called upon to decide the question of what is reasonable alimony that a man making \$120 a month should pay his wife pending the decision of a suit for divorce. He set the figure at \$15, considering it little enough, even though the woman in the case is living with her parents.

The problem came up in connection with the divorce suit brought by Mrs. William Blaisdell against her husband, following a case started by him. Blaisdell is an engineer at the central fire station and his wife alleged that he abducted their daughter, who was in her charge, the other day. She asked for the \$15 per month as counsel fee, pending the result of the hearing for a divorce.

Attorney Lorrin Andrews, who appeared for Blaisdell, said it was true that his client received a salary of \$120 per month, but Blaisdell, he added, was in debt to the extent of \$700 and has three children to care for.

Judge Robinson felt that Mrs. Blaisdell's request for but \$15 per month out of \$120 was reasonable and he allowed that sum.

## BECKLEY ESTATE IS LESS THAN EXPECTED

Although the estate of "Admiral" George C. Beckley was appraised, shortly after his death, at over \$120,000, a report prepared by M. T. Simonton, the master appointed by Circuit Judge Robinson, filed Saturday, shows that the net value is \$83,992. The difference is accounted for by the fact that at the time of the appraisal three notes aggregating about \$30,000, were outstanding against the estate.

Mr. Simonton's report indicates that if the widow of Mr. Beckley lives as long as she may reasonably expect to do, her daughter, Juanita K. Beckley, will have to wait until she is forty-two years old before she can receive the interest in the property left her by her father.

Mr. Simonton's report deals with the first and final account of Bruce Cartwright, Henry P. Beckley and Mrs. Mary C. Beckley, the executors under the will. The latter charge themselves with \$12,700.50 in the form of receipts and ask to be allowed \$12,093.59 for disbursements.

The appraised value of the estate is \$90,593, from which is deducted funeral expenses, administration costs and claims paid amounting in all to \$6901, making the net value of the estate \$83,992. The annual income on this at five per cent would be \$4194.60.

Under the terms of the will Mrs. Beckley is given a life interest in all the property. The value of this, after deducting inheritance tax of \$745, is placed by Mr. Simonton at \$42,242.36. The remainder of the estate is therefore \$41,747.64. Under the terms of the will this is to be divided as follows: One-third in fee to Henry P. Beckley, one-third in fee to George C. Beckley Jr., and a life estate in one-third to Juanita K. Beckley, and the remainder to her children.

This means that Henry P. Beckley and George C. Beckley Jr. will immediately receive \$13,915.55 and the Teritory benefits to the extent of \$358 inheritance tax. As Mrs. Mary C. Beckley's expectancy of life is sixteen years, Juanita K. Beckley will not receive her life estate in one-third of the remainder until she becomes forty-two. The present value of her life estate is put down at \$9225.94, the inheritance tax being \$44. The net amount of tax on the whole estate is \$1122.56. No tax was paid on the estimated value of the remainder which is willed to any children Juanita Beckley may have, it being less than \$5000, to be exact it is \$4594.

George C. Beckley died in San Francisco, July 4, 1910. Mr. Simonton, as master, recommends that the accounts, being correct in every particular, be approved and passed by the court.

## SACRILEGE AND THEFT IN PUNA

**BURGLAR TAKES COMMUNION SIL-  
VER AND VESTMENTS OF  
CATHOLIC CHURCH.**

An exceedingly peculiar and reprehensible robbery took place at Kapoho, Puna, a short time ago, when a burglar secured the altar silver and vestments belonging to the Catholic Church at that place, says the Hilo Tribune. Father Otto, who had charge of the church in Puna, last week reported the matter to Sheriff Puna, and the police are doing their best to solve the mystery.

The Catholic congregation at Kapoho does not possess a regular church building, but Father Otto has been given the use of the house formerly occupied by Chas. Weatherbee, and here services were held with a small portable altar. The articles used during the service were, when not in use, placed in a medium sized box, which was placed in a closet, the upper part of which was furnished with shelves. On the shelves were stored books and sacred pictures, none of which were of any great intrinsic value, but some of the articles in the box, which stood on the floor of the closet, were of considerable value, as they included the silverware used for the communion service, candlesticks, the altar-stole containing relics, chasubles, robes, stoles and surplices, many of the vestments being entirely new and of fine fabric which might prove a temptation to those having a fondness for such.

The door to the closet was locked, and the intruder had gained entrance by smashing in one of the lower panels thereof with an iron bar which he had brought along for the purpose, and which he left behind. Through the hole which he had thus fashioned the burglar pulled the box. It is evident that he did not enter the closet, as the nails sticking out at the edges of the hole would have prevented him from doing so, nor did he take any of the articles lying on the shelves. The box and its contents were, however, taken away bodily, and no trace was to be found of them.

Father Otto states that he last held service at Kapoho on Sunday, April 23, and as he has a large district to cover he did not revisit Kapoho until last Wednesday, when he discovered the loss of the church valuables.

While the members of the congregation, who are all Hawaiians, knew where the articles were kept, Father Otto feels certain that they are not the guilty ones, as he argues that their well known fear of the supernatural, of akus, would prevent them from interfering with church articles, even if their natural honesty did not. There is, however, in the neighborhood of the house, where the articles were kept, a camp occupied by Korean laborers, and it is believed that some of them are more likely to be the ones responsible.

Henry Lyman, of Kapoho, has offered a reward for the recovery of the articles, and the police are working on the case.

## VITAL STATISTICS

### BIRTHS.

BELSER—May 1, at 1324 Lunalilo, to Mr. and Mrs. John J. Belser, a daughter.  
NIEPER—May 4, at Wilhelmina Rise, to Mr. and Mrs. Carl H. Nieper, a son.  
HOLMBERG—May 26, at Quarry street, to Mr. and Mrs. John Holmberg, a daughter.  
KEKAHUNA—May 18, at 1517 School street, to Mr. and Mrs. James Kekahuna, a son.  
KAALOA—May 28, at 3253 Monsarrat road, to Mr. and Mrs. Samuel Kaalos, a daughter.  
MACKINTOSH—May 20, at Nuuanu avenue, to Mr. and Mrs. Arthur C. Mackintosh, a son.

### DEATHS.

FERREIRA—May 27, at Oahu Insane Asylum, Frank Ferreira, 42 years; general paresis.  
SCHILLER—May 27, at Children's Hospital, Harvey Schiller, 7 years; cerebro-spinal meningitis.  
HULL—May 28, at Leahi Home, Rosie Hull, 7 years; tubercle of lung.  
KEAHOE—May 28, at 1910 Fort street, Lepeka Keahehu (w), 59 years; pneumonia.

### MARRIAGES.

HEWITT-AUWHOLANI—May 11, at 768 Lono lane, A. M. Hewitt Jr., 23 years, of Honolulu, to Mary K. Auwholani, 21 years, of Wailua.  
AHUNA-SANTOS—May 13, at 768 Kanoa lane, Wallace Ahuna, 21 years, to Colosa L. Santos, 18 years, both of Honolulu.  
KAAPUNT-NAHAU—May 25, at Catholic Cathedral, George E. Kaapunt, 21 years, to Ellen Nahaui, 18 years, both of Honolulu.  
PERRY-LEILS—May 27, at 134 Vineyard street, Neal Clifford Perry, 24 years, to Emma E. Leils, 25 years (formerly of Dubuque, Iowa), both of Honolulu.

### OLD SOL WARMS THE UNIVERSE FREE OF COST

It was a happy thought of the man who discovered the way to bridge the sun's rays and make them profitable in heating water. Nearly everyone has noticed that water exposed to the rays of the sun will reach a high degree of temperature. It was in carrying out this idea that the inventor of the Baltimore Sun Heater found a way to provide warm water for the bath without cost after the heater is installed.

In an advertisement today there is published a letter addressed to W. B. Crow, agent for the Baltimore, in which a local man tells of the advantages of this method of heating water for the bath. A better testimonial for an article worth while is seldom read. The demand for the Baltimore Sun Heater is growing and the advertisements of Mr. Crow, in The Advertiser, are, in a large measure, responsible.

## BIG DOINGS IN PINEAPPLE TOWN

**LARGE BUILDINGS BEING RUSH-  
ED UP TO HANDLE  
THE OUTPUT.**

The solution of part of the sanitation troubles of the city is being solved down at Iwilei by the pineapple companies. Where at the beginning of the year there were only swamps and shakes, great buildings are being rushed up to meet the demands of the coming season. The Hawaiian Preserving Company started in June on an immense new factory, the main building of which covers two acres and where the juicy pines will be canned during next month, according to the plans at present.

Between the two factories the American Canning Company have rushed up a new building in which they have machinery installed that is turning out cans at the rate of two hundred a minute. During the season they expect to make sixteen million in all and at the present time are already about half way through with the job. Gradually Iwilei is being transformed and in a few years instead of the present eyesore the place will have a new appearance and maybe a new name—Pineapple Town.

The total output for the whole of the Territory this year is estimated at about 750,000 cases; it may reach more than this, however, as a slightly heavier crop is anticipated. Rain is needed at Wahiawa and if it comes along soon then the crops should be exceptionally good. According to Oscar Hoffman, a prominent San Francisco broker, who handles a great deal of the product, the demand for the Hawaiian pines is growing every year and in a few years the industry will be fairly on a big boom. The canned fruit is also doing a great deal to make Hawaii known throughout the world and is one of the best promotion assets that the Islands have.

### New Warehouse.

The Hawaiian Pineapple Company has a big warehouse in course of erection. This is a reinforced concrete building about eighty by 140 feet and is being used at the present time. The Hawaiian Products Company, which is run in connection with the former, has also had alterations made and expects to turn out more stuff than before.

A large production is expected in every department and the prospects look good for a fine season. They expect to have the factory working after July 4, and will employ somewhere in the neighborhood of 500 people during the rush time. A big boiler plant is being put in for the products company and it will now get its power direct from this, instead of having it come across from the old boiler plant.

### Making the Cans.

The plant that has been installed by the American Canning Company is the most up to date that it has installed anywhere. Two "lines" are hard at work and they are turning out 200 cans every minute. This means a total of sixteen million cans during the season, part of which will be sent across to the other islands, but the bulk will be used right on the spot.

The "lines" consist of two lines of machinery. The plain sheet tin is put in at one end and comes out in another building the finished can. When it goes in at the first machine it has a round piece stamped out of it which forms the bottom. This is "pearled" or turned up at the edges and passes along a belt to the next machine. Here the tin is put in, in strips, caught up by the machine, placed in position and bent around to form the can. The bottom is picked up when it comes along and is clamped onto the main body of the can. Before it is, however, the turned up edge is filled with a sanitary preparation that not only completely stops any air getting in, but keeps the can clean. Before the bottom is clamped on the main body of the can is soldered up as it passes on its way to where the bottoms are put on.

From there cans go through another machine that tests them out to see if they are airproof or not. A pressure of fifteen pounds is put inside them and any that have a small leak are rejected by the machine and thrown into a special receptacle. After they have been tested they go onto another belt and are carried along the platform outside the building and down under the sidewalk line to the warehouse where they are stacked.

It is a wonderful sight to see the huge piles. Already there are some eight million cans in the big heaps. When the canning factories are in full swing they are taken direct to where they are wanted and the pines are placed straight into them. The factory is the last word in can making and there should be no danger of the canneries running short during the coming season.

### A Big Job.

Of all the companies that intend handling the pineapples at Iwilei this season the Hawaiian Preserving Company has without any doubt, undertaken the biggest job. Where in the early part of February of this year there stood filthy swamp land, next month they will be causing the succulent fruit of the Islands. It was an enormous job for any man to undertake, but Samuel Evans, a man who has been conversant with matters of this kind for many years on the mainland, undertook to carry the work through, and up to the present time has succeeded far beyond expectations.

### New Ideas.

The main building covers two acres in extent and will be ready for the start about the middle of next month. The building is the latest thing in concrete and one of the features is the inclusion of high ribbed frame work which is the invention of the contractor. The scheme has been in vogue for four or five years on the mainland, but this is the first time that it has been tried out in Honolulu. One of the main features in connection with it is the roof, which is made out of the framing, covered over with concrete. The building is absolutely fireproof and the walls and roof are constructed of a steel network onto which the concrete is poured. The ribs which form

## TO SUMMON ALL OUR PHYSICIANS

**LIGHTFOOT PREPARING FOR A  
SENSATIONAL DEFENSE  
IN TEST CASE.**

Every physician in Honolulu, including those attached to the army and navy, face subpoenas to be issued by the defense in the case brought by Bert Lightfoot to test the authority of the board of health in prohibiting swimming in the harbor.

The subpoenas have not yet been issued, but Attorney J. Lightfoot, father of the defendant, who is conducting his case, has announced his intention of so doing and it is believed that they have been drawn up in anticipation of their need.

Bert Lightfoot stated last night that this wholesale summoning of Honolulu's medical fraternity will depend on the testimony to be given by Federal Bacteriologist Moses T. Clegg, who will be called to the stand by the defense, if not by the prosecution.

The latter is not yet through with its case, as President Mott-Smith of the board of health will continue his testimony today and will be succeeded by Dr. Donald H. Currie of the federal medical service. It is hardly probable that the prosecution will complete its case today until late this afternoon, if even then, and Doctor Currie, at least, has made arrangements to postpone the tour of the sanitation commission this afternoon a half hour later in anticipation of being detained in court.

While the Lightfoots did not state what evidence they expected from Mr. Clegg, it is presumed that the other physicians will be summoned in an attempt to get a majority opinion, if Clegg states that he believes, as does Mott-Smith and Currie, that swimming in the harbor is dangerous to health.

Bert Lightfoot spent the entire afternoon yesterday hunting for photographic evidence and claims to have taken numerous photos of nuisances situated near Waikiki beach which flow directly into the ocean at that point and expects to prove by this means that in permitting bathing at Waikiki and forbidding it in the harbor the board of health has indulged in unfair discrimination against the boat clubs.

## UNCLAIMED LETTER LIST.

List of letters remaining unclaimed for in the general delivery for the week ending May 27, 1911:

Adam, Miss Mary	Lucas, Albert Jr.
Baker, Mrs. Mary	McClure, Ernest
Herman	McClure, Miss Mabel
Benjamin, Mr.	McLean, Charles L.
Beckert, F. A.	Methodist
Blaisdell, Mrs.	Milne, George
Malin	Mitchell, J. E.
Bowker, Mrs. H. M.	Monetina, Mrs. M.
Brodie, Dr. J.	Numan, William
Bryant, Maria	Patton, Mrs. E.
Butts, Alfred S.	Page, G. B. (2)
Cooper, J. W.	Pemberton, Dase
Crowell, Rev.	Prendergast, M. J.
Davis, Mrs. G.	Rice, J. W.
Darius, William J.	Ros, Mrs. Eunice
Davis, Mrs. Joseph	Rykov, Semen
Dowden, Henry	Smith, Mrs.
Douglas, Percy S.	Robert E.
Farley, J. K.	Spencer, Chas.
George, E. M.	Spofford, Mr. and Mrs. C. W. (2)
Griffin	Stone, John R.
Lawrence (2)	Thomas, John
Haker, Miss Helen	Thomas, Miss Iona
Hart, Mrs. W. S.	Todd, Georgia
Hering, Fred	Weight, Chester K.
Howell, Dr.	Whitmore, Mrs. Edna
Walter O.	White, H. A.
Hugo, H.	Wilder, Col W. E.
Jones, Willis	
Kypta, M.	
Lamber, F. O.	
Lufkins, Mrs. M.	

Please ask for advertised letters.  
JOSEPH G. PRATT, Postmaster.

## FIRST AID.

During the warm weather, attacks of diarrhoea are very frequent and often are so swift in their results that life is in danger before a physician can be summoned. Every man who has the interests of his family at heart should keep a reliable remedy in his home for immediate use in cases of this kind. Chamberlain's Colic, Cholera and Diarrhoea Remedy is, without doubt, the best remedy prepared for diarrhoea. It should be given, if possible, at the first unusual looseness of the bowels. For sale by Benson, Smith & Co., agents for Hawaii.

part of this catch the liquid and hold it and very little of it drips through. It is finished on the inside with plaster and makes a neat job which is far and away ahead of anything else of the kind that has yet been seen here.

## Ahead of Time.

At the start of the work the general impression was that Evans could not get it finished in time, but he went into it and kept the work going day and night and during the first three months put in one thousand yards of concrete for each four weeks. He was supposed to have it ready for the machinery to go in by June 1, but had it all ready by May 2, and nearly everything is fixed up, except the last adjustments. The lighting of the building is another special feature and will be done by means of special wire glass. For this the glass is spun over a network of wire and makes it so that if a hole is knocked in it, it does not matter as the wire will hold it together and prevent it falling down and striking anyone below.

Great temporary war-houses are also being constructed and everything is being prepared for an early start. It is one of the largest jobs that has been done in the city.

The company calculate on handling about 250 tons of pines a day and outside the building there is a platform some 350 feet in length which will stand a strain of 500 pounds to the foot. This means that an enormous amount of the canned product can be stored on it waiting the arrival of the trucks to remove it to the wharves and subsequently to the ships.
